

Protecting Every Patient - From Toddlers to Teens

Accutech's Kidz pediatric patient elopement system draws on the unique capabilities of our Cuddles infant protection and ResidentGuard wander management systems. This ensures the safety and security of pediatric patients.

Built on our advanced wireless platform, Kidz helps you to guard against pediatric and patient flight while also providing the comfort and freedom your younger patients demand. Learn about the technology we use in our elopement prevention systems:

Cut Band

The Kidz Cut Band is uniquely effective in preventing patient elopement or flight due to its tamper-proof qualities. Once affixed to a child or adult, the cut-resistant band will sound an alarm if damaged or removed. Additionally, our Cut Band technology can be integrated into a facility's complete security system for additional peace of mind if the tag is removed, all doors can be locked automatically and a facility-wide alarm can sound.

ID-TAD

The ID-TAD (Identification-Tag Activator/Deactivator) is a handheld device that brings additional, functionality to the Kidz System. Nurses can turn tags on/off, verify tag numbers, review warranty dates and check remaining battery life from the LCD screen.

Kidz Software

Our easy-to-use Kidz Pediatric Elopement prevention system software enables you to admit and discharge patients and generate reports more simply and quickly than ever before. No enrollment is necessary for instant protection, and on-site staff training can be completed in minutes. There are only six different alarm types in the software for minimal false alarms and ease of use.

Multi-floor monitoring, event escalation, and auto-transfer capabilities are available, and the software can be updated for free to ensure that you're always operating with the latest features and benefits.

“We’ve used Accutech for over four years and find our Kidz system to be extremely user friendly and reliable. Plus, Accutech is great to work with—they’re always responsive to our needs. We highly recommend Accutech to other hospitals.”

Nancy Sanders, Director of Child Nursing
