

PULSE)) cuddles

INFANT PROTECTION SOLUTION

Cuddles Pulse improves on the popular Cuddles system with the addition of Pulse--**Accutech's premier real-time monitoring technology**. This ever-vigilant system monitors the presence of all active infant tags, assuring every baby is continuously accounted for via our proven infant security technology.

All-new features

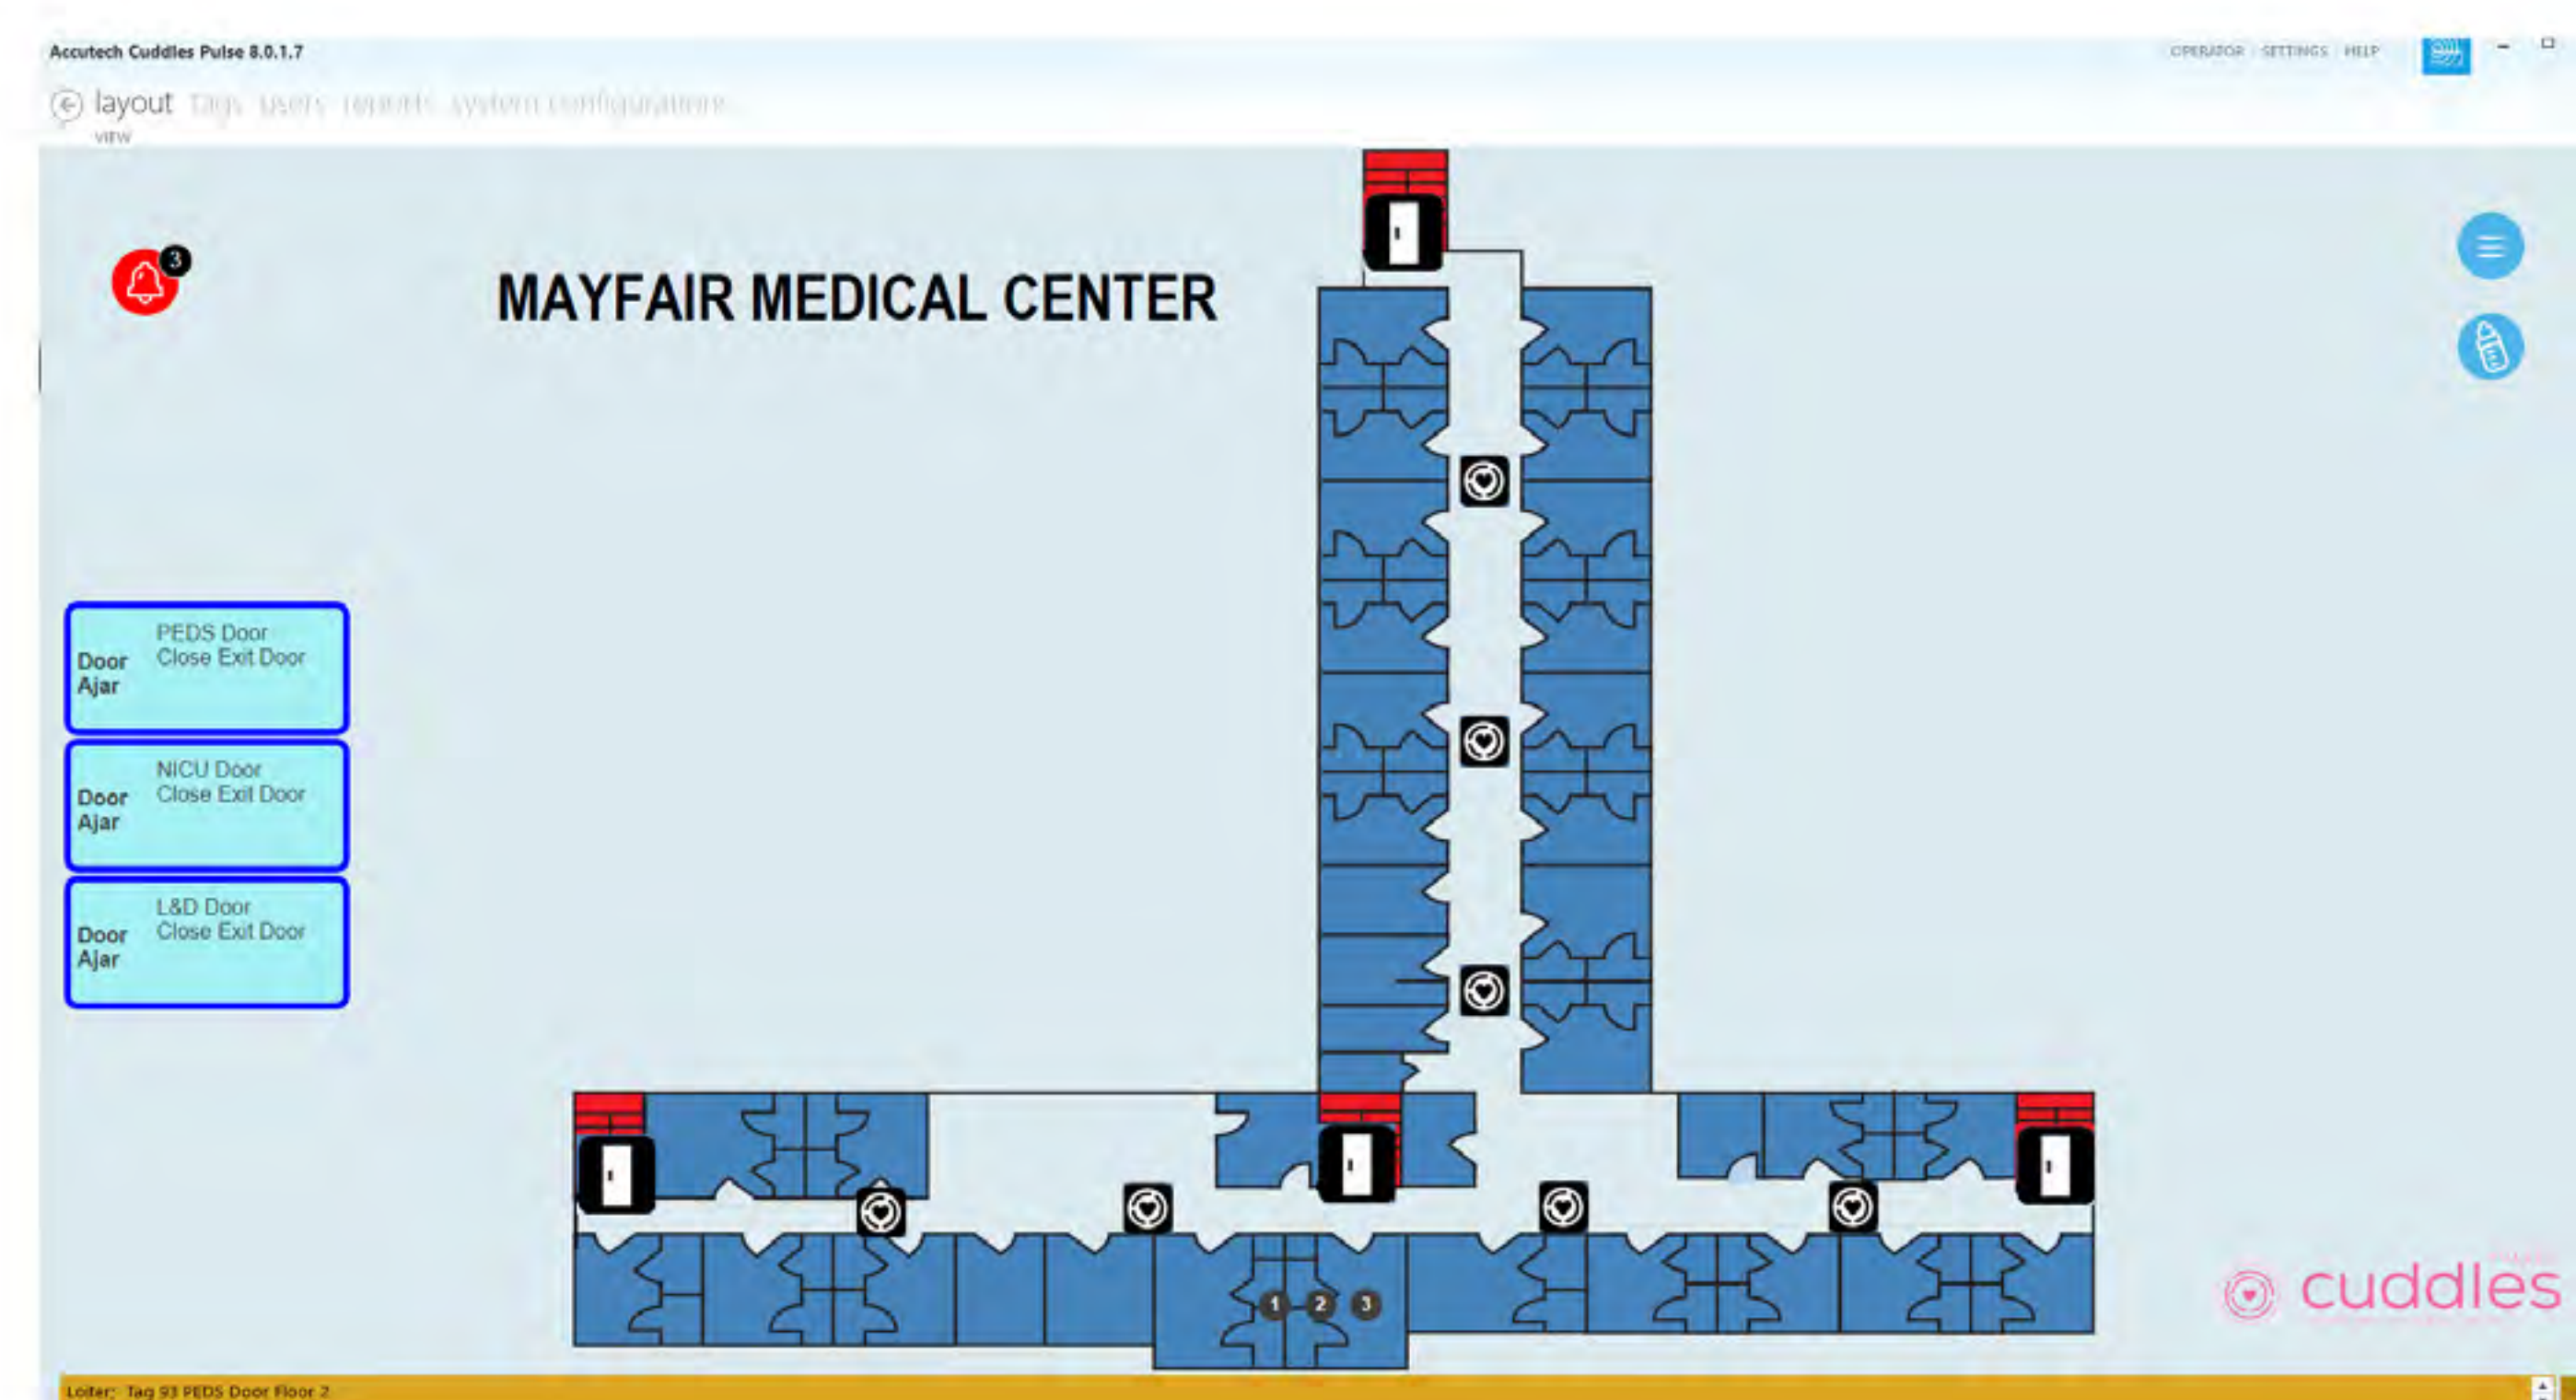

Improved beaconing technology

When not in an alarm state, the Cuddles Pulse tags send out a signal every 1.5 seconds to check in with the system. If seven of these signals are missed in a row, the system will notify your staff and can lock down the floor within 15 seconds of a tag's presence not being detected. **That's up to 90 seconds earlier than our competitors!**

Fully configurable software

Now you won't have to worry about taking apart controllers to access their internal components. All receivers are IP addressable, and we can troubleshoot or customize zones from our software. We've also shrunk the receivers and reduced the footprint of the controllers **surrounding the door**. Your staff will love the new streamlined design!

These great Cuddles features still remain

Hardware driven, software enhanced platform

While we have made many improvements to the Cuddles product, we have maintained the philosophy of providing a system that can operate independently of the software, keeping your patients protected in the event of a computer or network failure.

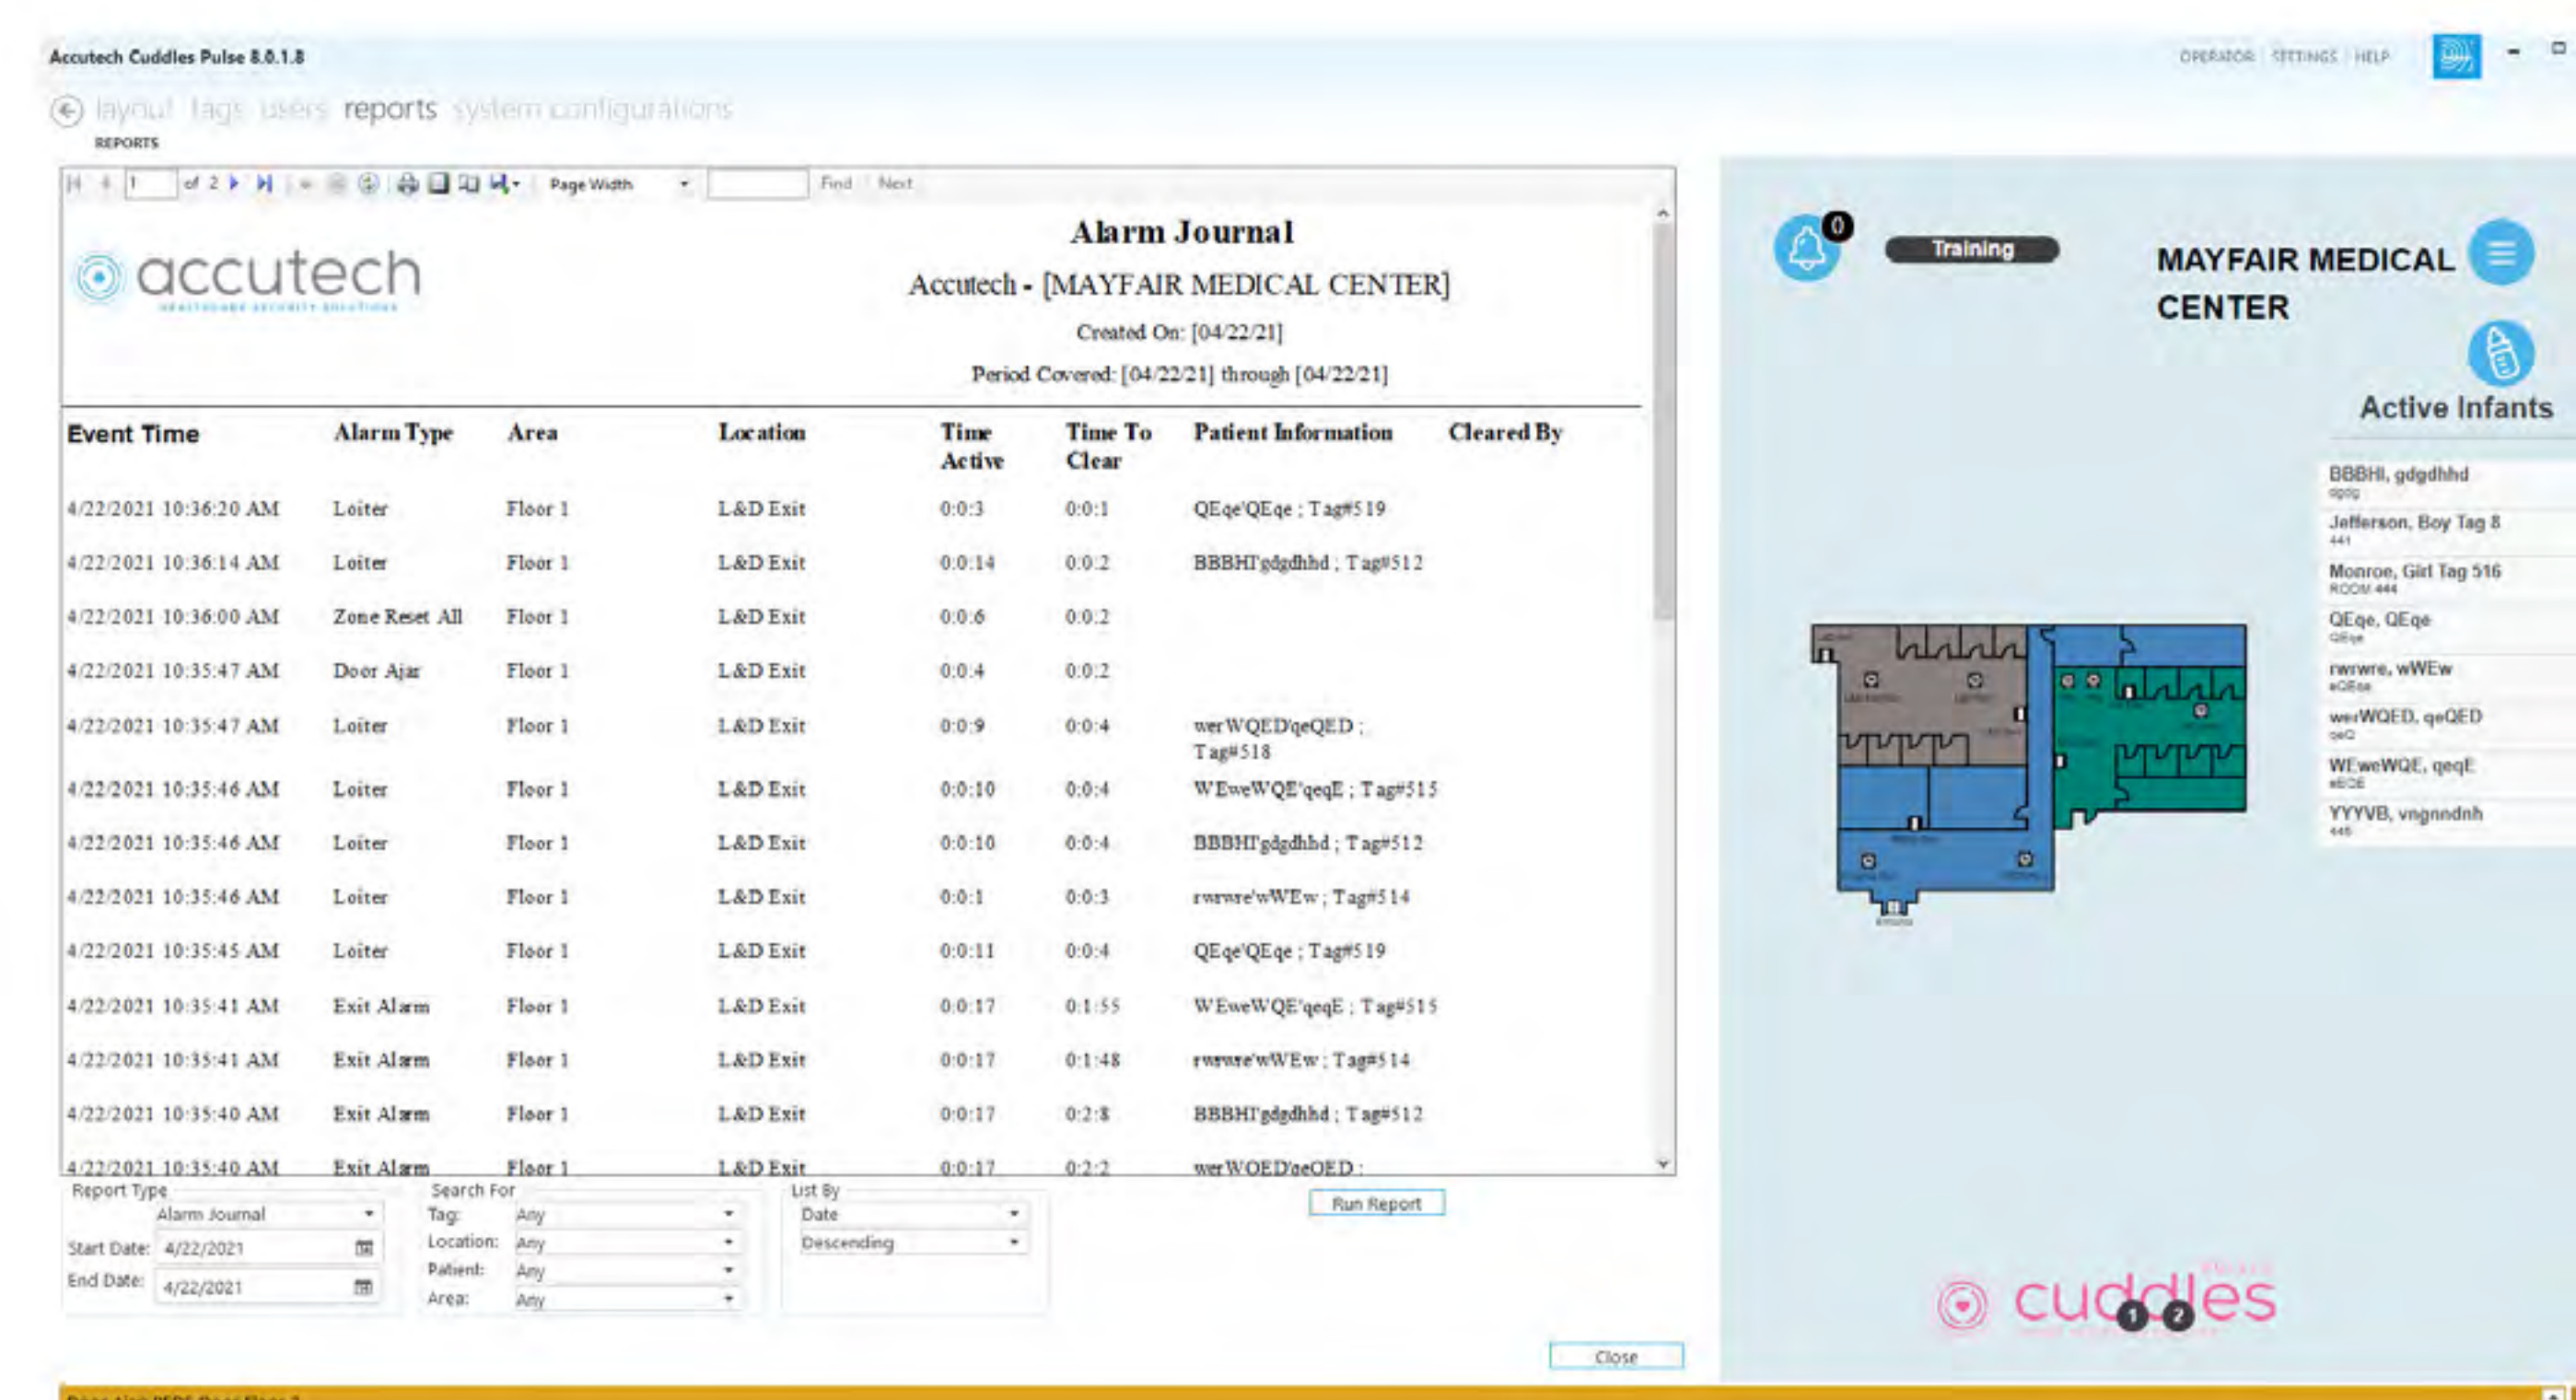

Soft, no-slip bracelet

Nurses and patients alike love our soft, self-adjusting bracelets. The tag never touches the baby's sensitive skin and always stays secure during those early days when the newborn loses weight. The Cuddles Pulse tag includes a six-month warranty, while the Cuddles tag includes a one-year warranty.

Maintaining the lowest false alarm rate in the industry

Accutech Security systems continue to deliver the lowest false alarm rate in the industry. The Cuddles system uses a unique RFID technology, data filtering, and changing exciter frequencies to identify and eliminate false alarms, preventing alarm fatigue and letting nurses focus on providing quality care.

Cuddles Pulse vs. Cuddles

	Cuddles Pulse	Cuddles
Patented Skin-Sensing, Cutband & Band Removal Notification Technology	✓	✓
Works if CPU/Network goes down	✓	✓
Self-adjusting Bands	✓	✓

Alarms when monitored exits are breached	✓	✓
Alarms instantly when tag is removed	✓	✓
Can turn tags on/off	✓	✓
Fully configurable via software	✓	
Real-time monitoring technology	✓	
Constant wireless communication with tags	✓	
Alarms if tag goes missing within 15 seconds	✓	
Can monitor thousands of tags at once	✓	

“

I like the **Cuddles soft band/tag** being on the infant’s ankle instead of tugging on their navel cord (like other systems). Parents report issues with umbilical tags when changing the diaper and are always concerned about the device tugging on the navel. The Cuddles tag/soft band are out of sight and mind. This system promptly works and has gone off every time we had an infant too close to the exits.”

**Rachael Winston, Director of Women’s Services,
BBH - Walker Baptist Medical Center**

“

I prefer the Cuddles Infant protection system over our previous security system... **Cuddles is more accurate in regard to the infant location** and the problem that needs to be addressed. It alerts you to a band alarm, band removal, infant removed from the unit and low tag battery. The guessing is no longer there as to what the problem may be.”

**Melissa Carter,
Communication specialist,
Baptist Health Lexington**

What happens to my current Cuddles installation?

At Accutech, we believe in providing world-class support for all our customers, for everyone choosing to partner with us with our latest technology & those who have partnered with us with our solutions. We will continue to manufacture, supply & service our Cuddles BR4200 system.

Along with this, we will continue providing our free 24/7/365 technical support for the life of every system & on-site support is available from our certified dealers, ensuring a resource for local support when needed. There are no required software maintenance contracts during the life of any Cuddles BR4200 system from us, and software upgrades will continue to be offered at no charge. Partnering with us, you can rest assured you won’t have to deal with forced obsolescence because a new generation of product is available. You’re the customer, we believe the choice should be yours to move when you feel the time is right.
